DETAILED ACTION

1. This office action is in response to communication filed on 8/3/2005.
2. Claims 8-16 have been elected.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 8-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Ferguson et al. (5,256,863 hereinafter Ferguson).

With respect to claims 8-16, Ferguson teaches a system for accumulating customer transaction data at the point of sale in a retail establishment and for effectuating customer promotion (abstract). A terminal for entering unique customer identification codes from customer identification presented at the point of sale in a retail transaction (col. 9, lines 35-40); means for allowing entry of customer transaction data (col. 9, lines 35-40); a processor and a memory responsive to said terminal and said means allowing entry for creating a database for a plurality of the store's customers' transaction data from prior shopping visits, such that data regarding individual customer's prior transactions are stored in association with said individual customer's unique identification code (col. 18, lines 10-21); circuitry responsive to said processor, memory, and a database for generating a customer information response signal at the point of sale during said individual customer's transaction in said retail establishment upon detection of a unique identification code of said individual customer (col. 18, lines

10-21); said signal being related to said individual customer's transaction data in shopping visits prior to the current shopping visit (col. 18, lines 18-51); and said signal providing information at said point of sale terminal derived from said database and useful for effectuating targeted customer promotion (Figure 8).

Response to Arguments

4. With respect to Applicant arguments pertaining to the restriction requirements, the Examiner wants to point out group I, consisting of claims 8-16 pertains to deriving a targeted customer promotion and that limitation is distinct from group II consisting of claims 17-76 which pertain to associating a customer with a dollar amount. The search for claims 8-16 would require a different search than the search for claims 17-76 and therefore the search for both groups would have been different and would have been a burden for the Examiner to conduct the separate searches. The examiner asserts that the restriction is proper under. See MPEP § 808.02 (c).

Point of contact

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Raquel Alvarez whose telephone number is (571)272-6715. The examiner can normally be reached on 9:00-5:00.
